

HEALTH TIP

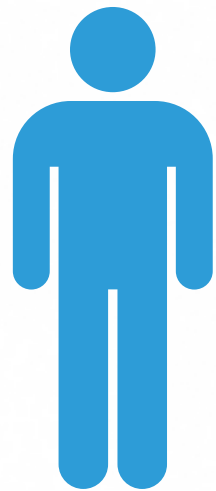

BLADDER CANCER: 5 KEY STATISTICS

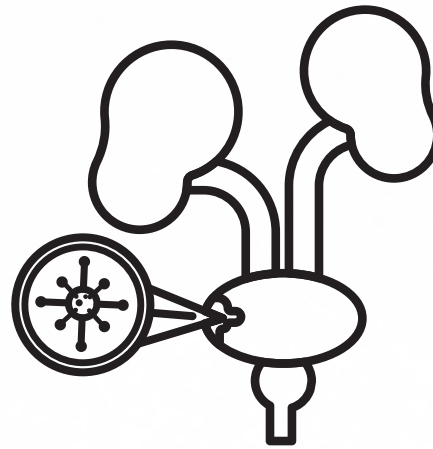

Awareness of the facts surrounding bladder cancer can help you be informed and diligent about your bladder health.

The rate of bladder cancer diagnosis has been **on the decline** since 2010. Bladder cancer deaths are also on the decline.

Bladder cancer is **more common in men**, ranking as the 4th most common cancer among the male population.

About $\frac{1}{2}$ of diagnosed bladder cancers are found when **the cancer is still within the inner layer** of the bladder wall.

Bladder cancer predominantly occurs in **people over the age of 55**, with 73-years-old as the average age at diagnosis.

Smoking (including cigarettes, cigars, and pipes) is thought to **cause nearly $\frac{1}{2}$ of all bladder cancers**.
