## Recording Consent Form – Clinical Documentation

Healthcare providers today spend a significant amount of time on computers documenting care, which takes away from their ability to spend time focused on patients. To support our mission of providing high quality care, we are using a new technology which uses artificial intelligence and associated workflows to generate documentation based on recorded audio of patient visits. This technology significantly reduces the amount of time your provider spends on documentation and allows more time for providing care to you and other patients. We use a third-party service provider to process the recorded audio and generate our clinical documentation and we have appropriate agreements in place to ensure the confidentiality of your information. All documentation is reviewed, edited if necessary, and approved by your provider, prior to finalization, to ensure the accuracy and completeness of your medical record.

We ask for you to sign this form to indicate your consent to have your visit recorded and processed, in this manner, for the purpose of documenting your care.

**This consent is voluntary, and your care will not be conditioned on providing consent.**

Please read the statement below carefully and sign to indicate your consent.

\_\_\_\_\_ Initial: I hereby consent to the recording of my visit today as well as any future visits. I understand that I may revoke my consent to the recording of future visits at any time.
